DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37, as specifically drawn to an oligonucleotide for preferentially killing cancer cells over non-cancerous cells comprising at least two CpG moieties and a prodrug for an antimetabolite covalently linked to the oligonucleotide, classified in class 535, subclass 22.1.
- II. Claims 38-44, as specifically drawn to a compound, classified in class 536, subclass 4.1.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-II represent separate and distinct products which are made by materially different methods, and are used in materially different methods which have different modes of operation, different functions and different effects. In the instant case, the oligonucleotide for preferentially killing cancer cells over non-cancerous cells comprising at least two CpG moieties and a prodrug for an antimetabolite covalently linked to the oligonucleotide of Group I and the compound of Group II are structurally and/or chemically and/or functionally distinct compounds such that one invention could not be interchanged with the other. For these reasons the inventions of Groups I-II are patentably distinct.

Because the inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search required for each group is not required for other groups because each group requires a different non-patent literature search due to each group comprising different products and/or method steps, restriction for examination purposes as indicated is proper.

Species Election

This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 2 and 25, Group I, are generic to a plurality of disclosed patentably distinct species comprising the following Antimetabolites, 2'-deoxy-3'-thiacytidine, 3'-azido-3'-deoxythymidine, ... chlorodeoxyadenosine and pentostatin which differ at least in chemical structure and function such that one species could not be interchanged with the other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Inna Landsman on July 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. In the instant case, Inna Landsman requested a written restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1642

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
